

REMARKS/ARGUMENTS

The specification and abstract have been amended to meet the grammar requirements and to overcome the inconsistency of the terms "retractable," "first housing" and "second housing." These changes in the specification are made
5 without adding new matters because the features of "the first housing is retractable relative to the second housing" may be clearly seen in the drawings and have been described in the original specification in another way.

Claims 1 and 7 are amended. Claims 5, 6, and 8 are canceled.
10

With regard to the claim objection, Applicants have amended the claims to state that the first housing (inner housing) is retractable relative to the second housing (outer housing) to overcome the inconsistency of the terms "retractable," "first housing" and "second housing." In addition, the specification never defines
15 part 12 as the second housing.

Claim 1 is amended to include the limitation of the original claim 5 and would be allowable. Claims 2, 3, 4, and 7 are also allowable because they depend on the allowable Claim 1.
20

In light of the above-mentioned amendments and remarks, Applicant now asserts that all of the grounds for rejection have been traversed or overcome by amendments, and that all of the present claims are in condition for immediate allowance. Applicant therefore requests reconsideration of the objections and
25 rejections, and solicits allowance of the present claims at an early date.
